

AWS CLI COMMANDS CHEAT SHEET

A PRACTICAL, SERVICE-WISE REFERENCE FOR DEVOPS ENGINEERS AND

CREATED BY RAHUL SWARGAM

DEVOPS ENGINEER | AWS | CLOUD & AUTOMATION

AWS CLI COMMANDS CHEAT SHEET

Compute Services

EC2 (Elastic Compute Cloud)

```
aws ec2 describe-instances           # List all instances
aws ec2 start-instances --instance-ids <id>      # Start an instance
aws ec2 stop-instances --instance-ids <id>       # Stop an instance
aws ec2 terminate-instances --instance-ids <id>  # Terminate an instance
aws ec2 create-key-pair --key-name <name>        # Create a key pair
aws ec2 describe-security-groups          # List security groups
```

AWS Lambda (Serverless Computing)

```
aws lambda list-functions             # List Lambda functions
aws lambda create-function --function-name <name> --runtime <rt> \
  --role <role> --handler <handler>      # Create a function
aws lambda update-function-code --function-name <name> \
  --zip-file fileb://<file>.zip          # Update function code
aws lambda delete-function --function-name <name> # Delete a function
aws lambda invoke --function-name <name> output.json # Invoke a function
```

AWS Elastic Beanstalk

```
aws elasticbeanstalk describe-environments # List environments
aws elasticbeanstalk create-application --application-name my-app # Create application
aws elasticbeanstalk update-environment --environment-name my-env \
  --version-label new-version # Deploy new version
```

Storage Services

Amazon S3 (Simple Storage Service)

```
aws s3 ls                               # List buckets
aws s3 mb s3://<bucket>                 # Create bucket
aws s3 cp <file> s3://<bucket>/         # Upload file
aws s3 rb s3://<bucket> --force          # Delete bucket
aws s3 sync <local-dir> s3://<bucket>/  # Sync local directory
```

Amazon ECR (Elastic Container Registry)

```
aws ecr get-login-password | docker login --username AWS \
--password-stdin <account>.dkr.ecr.<region>.amazonaws.com # Authenticate Docker
aws ecr list-repositories # List repositories
```

Container Services

Amazon EKS (Elastic Kubernetes Service)

```
aws eks list-clusters # List clusters
aws eks describe-cluster --name my-cluster # Describe cluster
aws eks create-cluster \
--name my-cluster \
--role-arn arn:aws:iam::account-id:role/EKSRole \
--resources-vpc-config subnetIds=subnet-xxxx,securityGroupIds=sg-xxxx
aws eks update-kubeconfig --name my-cluster # Configure kubectl
kubectl get nodes # List nodes
kubectl get pods -A # List pods
```

Amazon ECS (Elastic Container Service)

```
aws ecs list-clusters # List clusters
aws ecs list-services --cluster my-cluster # List services
aws ecs describe-services --cluster my-cluster \
--services my-service # Describe service
```

Identity & Access Management

IAM (Identity and Access Management)

```
aws iam list-users # List users
aws iam create-user --user-name <name> # Create user
aws iam attach-user-policy --user-name <name> \
--policy-arn <policy> # Attach policy
aws iam list-roles # List roles
aws iam create-role --role-name <name> \
--assume-role-policy-document file:///policy.json # Create role
aws iam list-policies # List policies
```

Networking

VPC (Virtual Private Cloud)

```
aws ec2 describe-vpcs # List VPCs
aws ec2 create-vpc --cidr-block <CIDR> # Create VPC
aws ec2 delete-vpc --vpc-id <id> # Delete VPC
aws ec2 create-subnet --vpc-id <id> --cidr-block <CIDR> # Create subnet
aws ec2 describe-subnets # List subnets
aws ec2 describe-internet-gateways # List IGWs
```

Elastic Load Balancer (ELB)

```
aws elbv2 describe-load-balancers # List load balancers
```

Amazon Route 53

```
aws route53 list-hosted-zones # List hosted zones
```

Deployment & Infrastructure as Code

AWS CloudFormation

```
aws cloudformation list-stacks # List stacks
aws cloudformation create-stack --stack-name my-stack \
  --template-body file://template.yml # Create stack
aws cloudformation deploy --template-file outpost-config.yml \
  --stack-name my-outpost-stack # Deploy stack
```

AWS Auto Scaling

```
aws autoscaling describe-auto-scaling-groups # List ASGs
aws autoscaling update-auto-scaling-group \
  --auto-scaling-group-name my-asg --desired-capacity 3 # Update capacity
aws autoscaling set-desired-capacity \
  --auto-scaling-group-name my-asg --desired-capacity 2 # Manual scale
```

CI/CD Services

AWS CodePipeline

```
aws codepipeline list-pipelines # List pipelines
aws codepipeline start-pipeline-execution --name my-pipeline
```

AWS CodeBuild

```
aws codebuild list-projects # List projects
aws codebuild start-build --project-name my-project
```

AWS CodeDeploy

```
aws deploy list-applications # List applications
aws deploy create-deployment --application-name MyApp \
  --deployment-group-name MyDeploymentGroup \
  --s3-location bucket=my-bucket,key=app.zip,bundleType=zip
```

Security & Compliance

AWS CloudTrail

```
aws cloudtrail describe-trails # List trails
```

AWS Secrets Manager

```
aws secretsmanager list-secrets # List secrets
aws secretsmanager get-secret-value --secret-id my-secret
```

AWS GuardDuty

```
aws guardduty list-findings # List findings
```

Monitoring & Logging

Amazon CloudWatch

```
aws cloudwatch list-metrics # List metrics
aws cloudwatch put-metric-alarm --alarm-name cpu-high \
  --metric-name CPUUtilization --namespace AWS/EC2 \
  --statistic Average --period 300 --threshold 80
aws logs describe-log-groups # List log groups
aws logs get-log-events --log-group-name my-log-group \
  --log-stream-name my-log-stream
```

Messaging & Workflow

Amazon SNS

```
aws sns list-topics # List topics
aws sns publish --topic-arn <topic-arn> --message "Test Message"
```

Amazon SQS

```
aws sqs list-queues # List queues
aws sqs send-message --queue-url <queue-url> \
  --message-body "Hello World"
```

AWS Step Functions

```
aws stepfunctions list-state-machines # List state machines
aws stepfunctions start-execution --state-machine-arn <arn>
```

Data & Analytics

AWS Glue

```
aws glue get-databases # List databases
aws glue get-tables --database-name my-database # List tables
aws glue start-job-run --job-name my-glue-job
```

Management Tools

AWS Systems Manager (SSM)

```
aws ssm describe-instances # List managed instances
aws ssm send-command --document-name "AWS-RunShellScript" \
  --targets "Key=instanceIds,Values=i-xxxxxxx" \
  --parameters commands="sudo apt update"
```

AWS Outposts (Hybrid Cloud)

List and Describe Outposts

```
aws outposts list-outposts
aws outposts get-outpost --outpost-id <outpost-id>
aws outposts get-outpost-instance-types --outpost-id <outpost-id>
```

Manage Outpost Resources

```
aws outposts list-sites
aws outposts list-orders
aws outposts list-outpost-instances --outpost-id <outpost-id>
```

Deploy and Configure Outposts

```
aws outposts create-order \
  --line-items "[{\"catalogItemId\": \"item-id\", \"quantity\": 1}]" \
  --outpost-id <outpost-id>
aws outposts update-outpost --outpost-id <outpost-id> --name <new-name>
```

Networking and Storage on Outposts

```
aws outposts list-outpost-network-devices --outpost-id <outpost-id>
aws s3 ls --outpost-id <outpost-id>
aws s3 mb s3://<bucket-name> --outpost-id <outpost-id>
```

Deploy EC2 in Outposts

```
aws ec2 run-instances --image-id <ami-id> --instance-type <type> \  
--subnet-id <outpost-subnet-id>
```

Delete Outposts

```
aws outposts delete-outpost --outpost-id <outpost-id>  
aws outposts cancel-order --order-id <order-id>
```
